

## Seven reasons to support this project

### *Here...*

1. Almost everyone quickly sees the program's importance.
2. Through such hands-on service, young people will develop as human beings.
3. Older adults working with younger people will be producing magic inter-generational music.
4. Church communities and other groups will discover a sense of authenticity and relevance.

### *There...*

5. The little kids who receive this food will experience brain, muscle, and bone growth.
6. Local Christian partners will be able to punctuate their Gospel words with deeds of love.
7. Local leaders will be given time to develop other food-producing strategies.

Caring Hearts Renewing Lives

**Kids Against Hunger™**

A program of Feeding Children International

***For more information or to schedule a packaging event, please contact Rudy at [rudy.schaser@sbcglobal.net](mailto:rudy.schaser@sbcglobal.net) or call 314-965-2779. website: [www.wglo.org](http://www.wglo.org)***

## Come Together. Save a Life.

Turn your gathering into a life-saving event! By preparing packets of tasty, high-nutrition food, you can help an African orphan stave off starvation.

### This is How it Works

- First, your group gathers funds to purchase Kids Against Hunger™ food ingredients.
- With God's Little Ones (we work with a Kids Against Hunger™ satellite) will bring to your location everything you need to make this good thing happen: food ingredients, containers, scales, sealers, and supplies.
- Just about any good setting would serve well as a packaging event: a youth group, a birthday party, VBS or Sunday School, service clubs, etc.
- With God's Little Ones will coordinate the shipping of the food to children who need it most.

One serving of the Kids Against Hunger™ casserole will keep a child going for one day. Ingredients of this high-nutrition foodstuff are:

- white rice
- soy nuggets
- 22 vitamins and minerals
- dried vegetables
- chicken flavoring

The packet, which contains six servings, is boiled in water for about 20 minutes -- purifying the water as it cooks the food. A carton of 36 packets provides 216 meals. The cost of a carton is about \$55.00.

Adults and youth measure and pour the ingredients into uniform plastic packets.

The packets are weighed and sealed.

Cartons are packed and taped, ready for shipment.
